## **The Male-Female Interaction**

Over the last several years I have seen that there is a certain interaction between men and women. This interaction repeats itself over and over.

I call it The Male-Female Interaction.

This specific interaction between men and women happens in every sexual situation. When picking up women, on a date, during foreplay, and when having sex.

I see the male-female interaction as the natural way for men and women to interact. I still haven't found an exception to this type of interaction. It has worked on all the women I've met.

The male-female interaction consists of 5 steps. Starting with step 1 and ending with step 5. Then you go back to step 1 and start the cycle once more.

**Step 1: Making a move (The masculine decision)**

**Step 2: Resistance**

**Step 3: Calm-assertiveness (Repetition – Making the same move)**

**Step 4: Acceptance or Rejection (The feminine decision)**

**Step 5: Compliment (Optional)**

I have explained all of these steps in earlier blog posts and articles, so I won't go into details here. But I'll describe the interaction with an example.

(This is just an example. I could have used any example here, because the male-female interaction is the same every time you do something sexual with a woman.)

Let's say you're fucking your girl doggy-style. And while you're fucking her, you want your girl to spank her own ass.

So, you say casually, "Spank your ass, baby!" (Step 1)

Your girl doesn't react. She acts like she didn't hear you. This is a common type of resistance. (Step 2)

Now, you calmly and assertively repeat yourself. You don't have to use the same words, but you cannot give in. You can't stop what you have started, because that's a turn off.

So, you say, "Spank your ass, baby! I love it when you spank your ass!" (Step 3)

Now, your girl may resist again. This is very common, and it doesn't mean anything. You just continue until she accepts your proposal.

This means that you stay in a loop between step 2 and step 3. You may repeat yourself several times. (2-5 repetitions are common.)

This loop ends when your girl accepts your proposal, or rejects it. This is step 4.

In the example, let's say your girl says, "I don't want to." (Step 4). This is a 'more assertive' type of resistance, and '*more* assertive' resistance means that she rejects your proposal. You now have to go back to step 1 and do something else.

**Note:** *Women will always resist you more assertively when they want you to stop. If the resistance doesn't get more assertive, you have to continue. (Never back down unless the resistance gets more assertive.)*

If your girl accepts your proposal and starts spanking her own ass (Step 4), then give her a compliment. For instance, say, "Oh my God! That's so hot!" (Step 5)

This last step is optional, but it's a good idea because your girl will remember your compliment the next time you ask her to spank her own ass.

Now, start the male-female interaction again by going back to step 1. Use your creativity, and come up with something else to do.

This is an ongoing cycle. And the steps are the same every time.

Everything you have learned about leading, creativity, masculinity, femininity, testing, compliments, dealing with your own feelings, self-development, etc., belong to the male-female interaction. It sums up pretty much everything I'm writing about on my blog.

This means that even though the male-female interaction is a simple 5 step process, there is always room for improvements. The interaction with women is always the same, but every step can be improved.

-Tom
