'Hard Limits' - Do Women Have Limits in Bed? (Part 1)

If you're like me, then maybe you like to be a little wild in bed. Maybe you like to push the limit.

But how much are women willing to do in bed? Are there any limits?

I used to believe women have hard limits. But it seems to me women go along with almost anything. For instance, I've had a germophobe give me a rimjob. And a "spermophobe" taken it in her mouth.

So, maybe hard limits aren't that 'hard' after all.

In tomorrow's post I'll tell you the most important factor when it comes to getting a woman to do anything in bed.
